

Preparing, submitting, and publishing a journal article

Jo Setchell

Dr Joanna M Setchell

Editor-in-Chief

International Journal of Primatology
Anthropology, Durham University, UK
joanna.setchell@durham.ac.uk

Why?

An essential part of research

*"It's publish or perish,
and he hasn't published"*

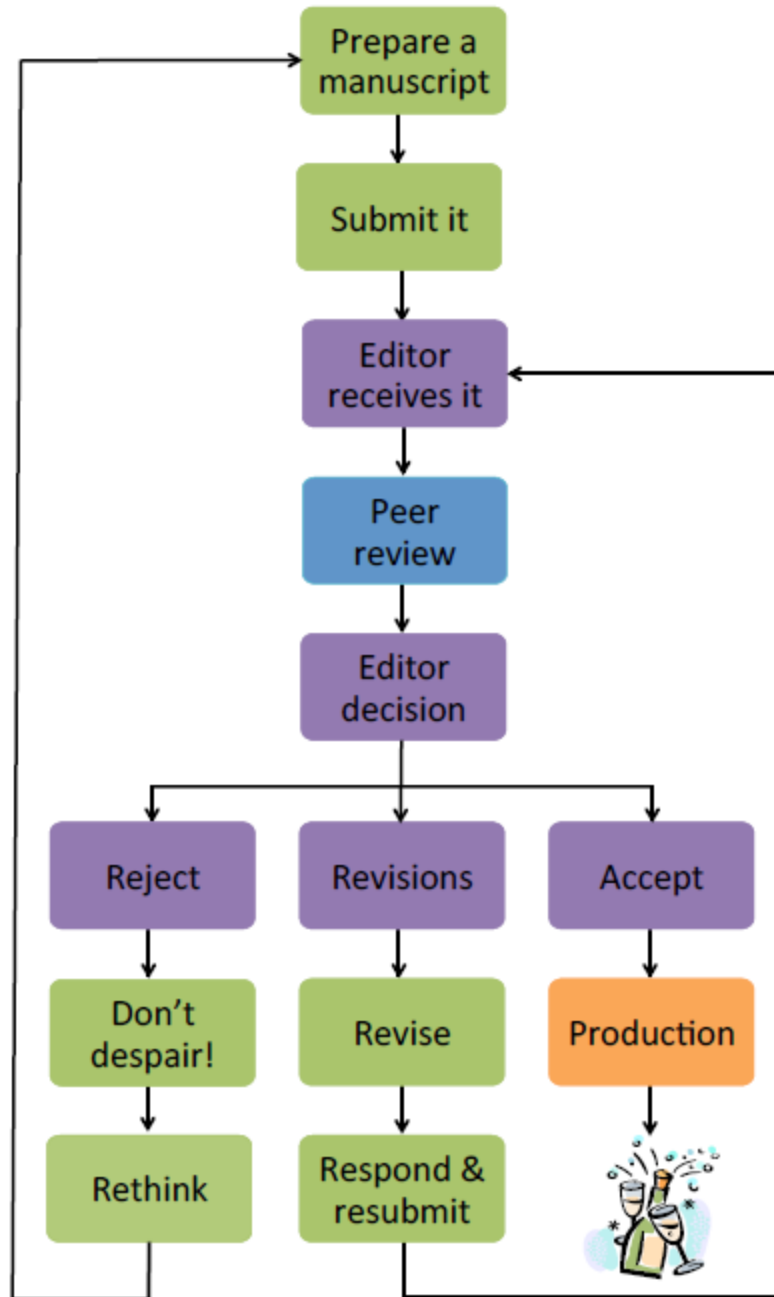

To sustain or further a career

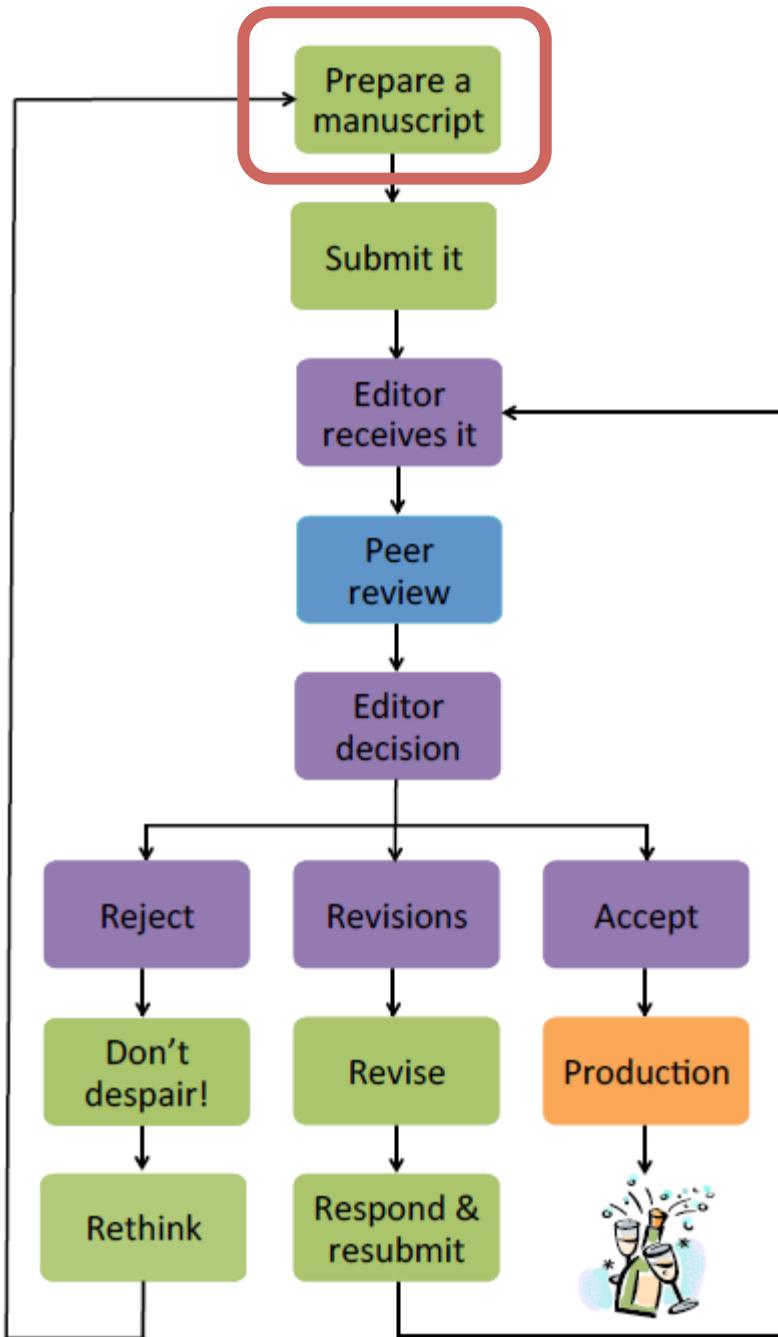

Journal articles

Primary outlet for high-quality original research

Process can be time-consuming & challenging

How?

Check aims & scope
Check other articles in journal
Follow instructions
Be clear, accurate & concise
Get someone to read your manuscript
Do not expect reviewers / editors to correct your English

More on writing

You do not need to trash other people's work to introduce your own

Keep methods in the methods (not the results) and discussion in the discussion (not the results)

Maintain the same order of material throughout your manuscript

For example, if you set out 3 aims, organize the data analysis section, the results, and the discussion, in the same way

Avoid listing articles but providing no information about their content

Cite literature fairly

Follow instructions!
Suggesting referees is optional for many journals and worth doing

You can also block reviewers

Editor reads ms, decides whether to send it for review

Might use Editorial Board or Associate Editors

Usually 2 or 3 reviewers

Reviewers read the ms critically and make written comments

They can also make comments to the editor

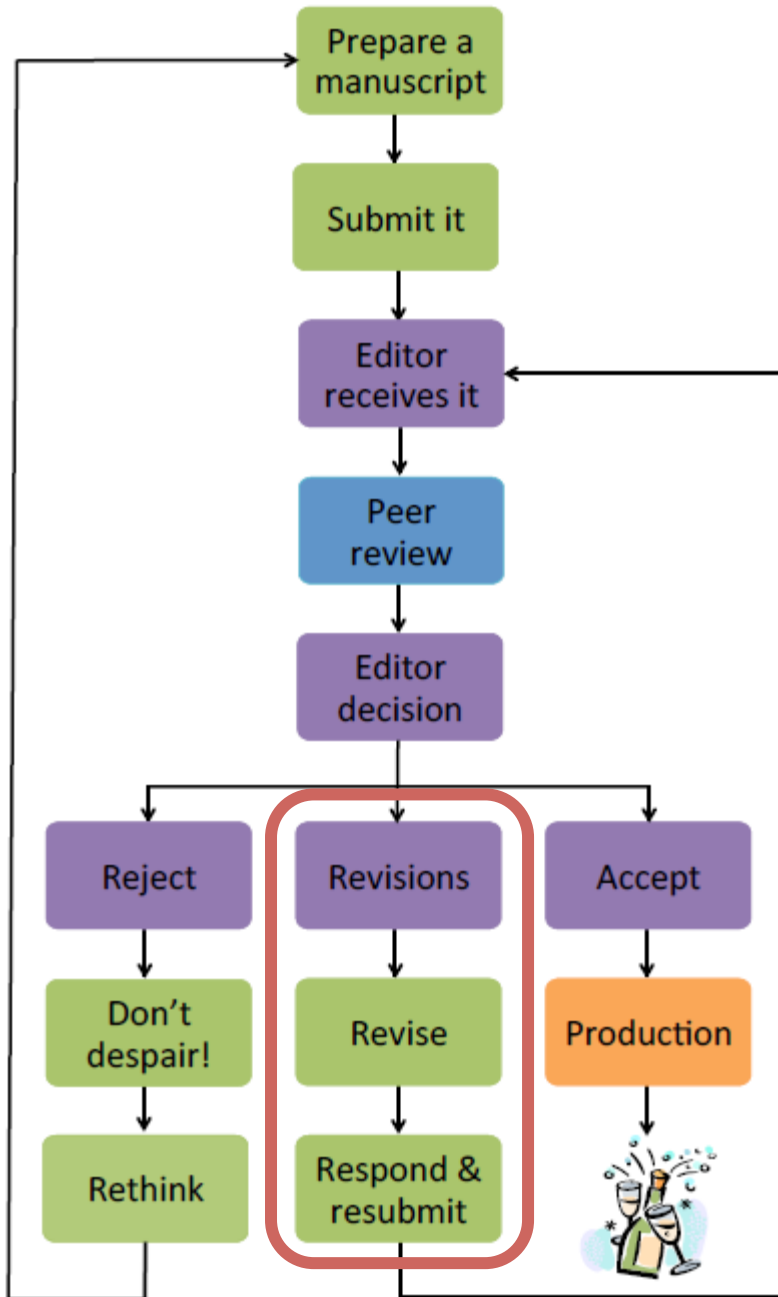

Read comments
carefully

Reflect on reasons for
rejection

Revise and send it
elsewhere

Do not just reformat
and submit elsewhere

Acknowledge reviewers
& editors

Read comments carefully

Don't panic or get upset

Take comments constructively

All comments help

Talk to co-authors & colleagues

Send a detailed response letter

Be polite and thank the editor & reviewers

Explain changes you made

If you choose not to follow a suggestion, explain why

Do not just rebut ALL comments

Follow instructions!

Acknowledge the reviewers!

Complete copyright
declaration & reprint
forms

Cover image?

Check proofs carefully
and send them back
quickly

Ask production editor if
you have any queries

Send reprints to people
and be pleased that
your paper is out!

Remember

You don't start out writing good stuff. You start out writing crap and thinking it's good stuff, and then gradually you get better at it. That's why I say one of the most valuable traits is persistence

Octavia Butler, Locus Magazine, June 2000
